HUNTSVILLE OFFICE - W. Duncan

Colonel Whittaker has asked me to convey to our management his deep concern over the situation that exists with regard to DSP spares. He is very much concerned that his field commitments may be in jeopardy. He is fully aware that his Procurement and Production Division erred in not requiring in our contract proper phasing of the shipment of spares, but he evidently believes that we may have taken advantage of the situation.

I have asked Bill Flanigan to let me have just as soon as possible the best feasible schedule of expedited shipments. The HAWK Program Management Office will review it to ascertain how it may be best adjusted to meet Colonel Whittaker's commitments.
